Code:

form-demo.component.html :

```html
<div style="text-align: center;">
    <form #login="ngForm" (ngSubmit)="Submit(login)">
        <div class="form-group">
            <label for="exampleInputEmail1">Email address</label>
            <input #name="ngModel" required minlength="2" type="email" class="form-control" id="exampleInputEmail1" name="email" placeholder="Enter email" ngModel>

            <div *ngIf="name.touched && name.invalid" class="alert alert-danger">
                <div *ngIf="name.errors?.['required']">Email is required</div>
                <div *ngIf="name.errors?.['minlength']">Email must be at least 2 characters long</div>
                <div *ngIf="name.errors?.['email']">Enter a valid email</div>
            </div>
        </div>

        <div class="form-group">
            <label for="exampleInputPassword1">Password</label>
            <input #password="ngModel" type="password" class="form-control" id="exampleInputPassword1" name="password" placeholder="Password" ngModel required>

            <div *ngIf="password.touched && password.invalid" class="alert alert-danger">
                <div *ngIf="password.errors?.['required']">Password is required</div>
            </div>
        </div>

        <button type="submit" class="btn btn-primary" [disabled]="login.invalid">Submit</button>
    </form>
</div>
```
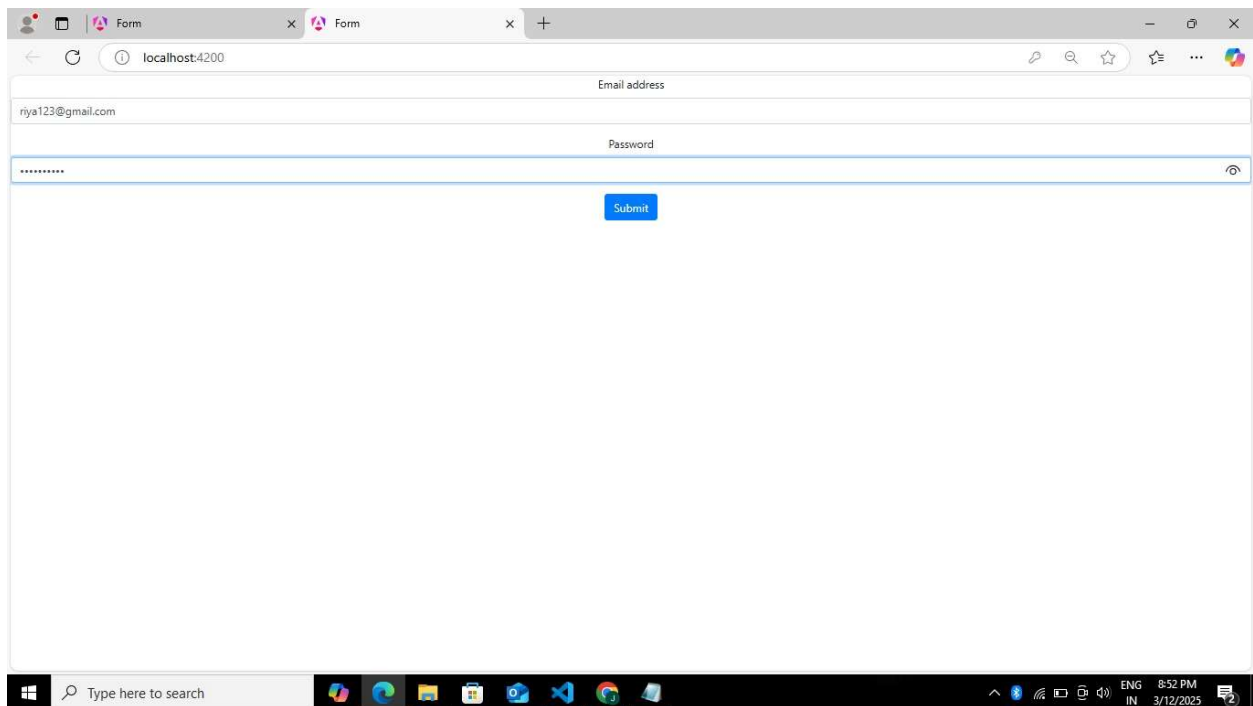

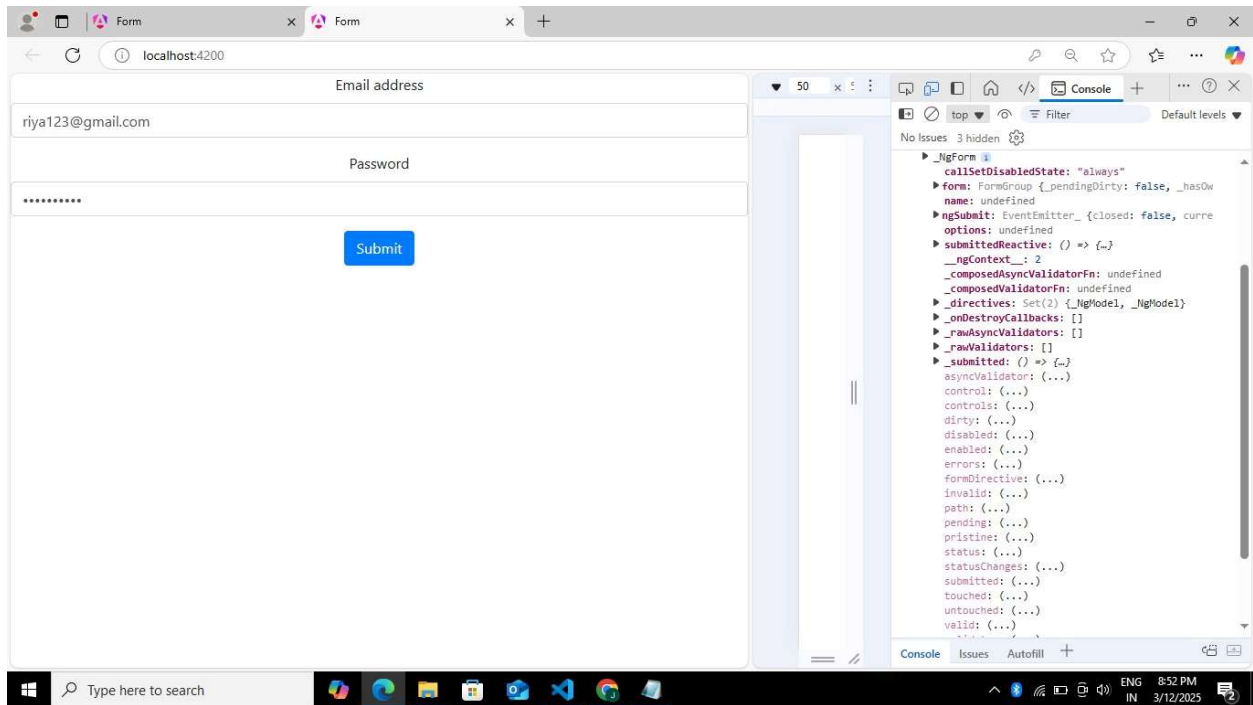

form-demo.component.ts:

```typescript
import { Component } from '@angular/core';

@Component({
  selector: 'app-form-demo',
  standalone: false,
  templateUrl: './form-demo.component.html',
  styleUrl: './form-demo.component.css'
})
export class FormDemoComponent {

  Submit(login:any)
  {
    console.log("submitted",login);
  }
}
```

app.component.html:

```html
<app-form-demo></app-form-demo>
```
